-How to submit Invoice via WEB API-

The Flow of invoice from WEB API to RAMIS System

A. WEB API Submission

- 1 **Authentication** — The SSID and password are required and validated. Invalid requests are rejected immediately, while a valid SSID generates a JWT token, which is used to authenticate subsequent requests.
- 2 **Invoice submission pipeline** — The validated/authorized invoice is transmitted through the following process flow: WEB API → MSMQ (Message Queue) → Listener Service → RAMIS for processing.
- 3 **Schedule branching** — When RAMIS receives the data through WEB API, it applies the below auto-save rules:
 - a. Once a valid invoice is submitted by the supplier, it is automatically recorded in the supplier's **Schedule 1**, while the corresponding invoice record is simultaneously recorded in the respective purchaser's Schedule 2.
 - b. Once a valid tax credit note or tax debit note is submitted by the supplier, it is automatically recorded in the supplier's Schedule 4, while the corresponding tax credit note or tax debit note record is simultaneously recorded in the respective purchaser's **Schedule 4**.
 - c. Once an invoice relating to a zero-rated service is submitted by the supplier, the invoice is automatically recorded in the supplier's **Schedule 7**.

Sri Lanka Inland Revenue

- How to submit Invoice via WEB API -

B. API Record Verification and Approval

- **Schedule 1**
Login with **supplier TIN** to search for schedule 1 invoice data

The screenshot shows the Sri Lanka Inland Revenue web portal. The top navigation bar includes links for Financial, Return Issuance, Appeal, Return / Schedule Management, Objection, Payment, Refund, and Taxpayer Register. The 'Return / Schedule Management' link is highlighted with a red box. Below the navigation bar, the 'Dashboard' section is visible, featuring an 'Overview' area with icons for Return Filing Status, Account Summary, Clearance Status, and Tax Agent. A 'Process flow - Tax type specific' section is also present, with a dropdown menu for 'Select a value' and a 'taxable period' field. The 'Return / Schedule Management' link is highlighted with a red box and a red circle with the number 1.

- Where the purchaser intends to claim input tax on the relevant invoice in a later taxable period, the period code of the respective Schedule 2 record may be changed. Such change can only be made after the VAT return for the relevant taxable period has been issued.
- Where any part of the VAT amount relating to the invoice is not claimable, the purchaser may update the disallowed **VAT amount** accordingly.

- How to submit Invoice via WEB API -

- 9 Once the purchaser has updated all the data, they need to click the **"Save"** button. The following screen will appear thereafter.

The screenshot shows the 'VAT Schedule 2 (Input VAT) - Detail' form. A confirmation dialog box is displayed in the center, asking 'Are you sure you want to save this record?' with 'Yes' and 'No' buttons. The form fields include: Purchaser's TIN, Period Code, Serial No., Invoice date, Tax Invoice No., Supplier's TIN, Name of the supplier, Description, Value of purchase, VAT amount, Disallowed VAT, Status (Pending Approval), and Unmatch reason.

The screenshot shows the same 'VAT Schedule 2 (Input VAT) - Detail' form. A success message dialog box is displayed in the center, stating '13016: Saved successfully.' with an 'Ok' button. The form fields are the same as in the previous screenshot.

- 10 When the purchaser opens the record for review, the status will appear as **"Pending Approval."** After completing the review, the purchaser may approve the data.

Please refer to the screen below.

The screenshot shows the 'VAT Schedule 2 (Input VAT) - Detail' form. The 'Status' field is highlighted with an orange box and labeled '10', showing 'Pending Approval'. The 'Approve' button is highlighted with an orange box and labeled '11'. The form fields include: Purchaser's TIN, Period Code, Serial No., Invoice date, Tax Invoice No., Supplier's TIN, Name of the supplier, Description, Value of purchase, VAT amount, Disallowed VAT, Status, and Unmatch reason.

- 11 Purchaser clicks on the **approve** button, below screens appear

- How to submit Invoice via WEB API -

- 9 The purchaser may also perform approvals in bulk.
- 10 The purchaser may select multiple records, up to a maximum of 5,000 records, by ticking the respective checkboxes in order to approve them simultaneously.
- 11 The purchaser may select up to 5,000 records displayed within a tab on the list page at once by clicking the relevant checkbox, in order to approve them in bulk.
- 12 Once Purchaser clicks **Approve** button, the following screen will appear.

The screenshot shows a web application interface with a table titled 'List'. The table has columns: Serial No., Supplier's TIN, Purchaser's TIN, Invoice date, Invoice No., Tax credit/tax debit note, and Date of tax credit/t. Two rows are visible, both with checkboxes in the first column selected. A confirmation dialog box is centered on the screen, asking 'Are you sure you want to approve the selected records?' with 'Yes' and 'Cancel' buttons. At the bottom right of the table, there is an 'Approve' button highlighted with an orange box. The 'Export to excel' button is also visible.

Serial No.	Supplier's TIN	Purchaser's TIN	Invoice date	Invoice No.	Tax credit/tax debit note	Date of tax credit/t
2	300705936	300408754	2025-07-13	5CH3NV002	G	2025-07-13
3	300705936	300408754	2025-07-13	5CH3NV001	G	2025-07-13

The screenshot shows the same web application interface, but now a success message dialog box is displayed. The dialog box has a title bar 'Info' and contains the text 'Selected records have been approved successfully.' with an 'Ok' button. The background table and buttons are still visible but slightly dimmed.

- 13 Purchaser can verify the status of the records, status should be **matched**
